# Sora

Sora is an AI model developed by OpenAI, designed to generate high-quality video content. It is based on the GPT-4 architecture and is capable of understanding and generating video sequences from text prompts.

- Sora is a text-to-video model that can generate realistic and detailed video clips from a single text prompt.
- Sora is designed to be used for a variety of applications, including content creation, marketing, and entertainment.

Sora is currently in a beta testing phase, and OpenAI is working to make it available to a wider audience in the near future.
